

Make the most of your equipment, space and time

- ⇒ Book resources, not just rooms
- ⇒ A Cloud subscription model means lower total cost of ownership
- ⇒ Fast, efficient and scalable: great for institutions of any size

*"With big global interest in Resource Booker and more than 10 implementations currently in progress, this is a really exciting time for our Cloud-based solutions. Resource Booker's flexibility, ease of use and feature set make it stand out from the crowd. With new features being added all the time, the product continues to go from strength to strength."*

## Simplifying a complex problem

Your space, equipment and people are your most valuable resources; managing them effectively across multiple faculties and sites is one of the biggest challenges faced by education institutions today. Resource Booker empowers students and staff to make and manage their own room and resource bookings, reducing the burden on your institution.

## Administrative Control

You can define and create your own resources. You can specify who can book them and when—all from within the Resource Booker user interface.

## Easy to use

Resource Booker has a great-looking, intuitive user interface, designed to be used without training. With Single Sign On support, users can quickly and easily log on, filter and search for available resources, and make a booking from any web-connected device.

Make the most of your equipment, space and time

## Key features and benefits

### Book resources, not just rooms

Create and manage multiple types of resources to represent your equipment, people and spaces: projection screens, laptops, staff members, car parking spaces, catering equipment, study desks and of course, rooms.

### Compound Bookings

Need a room for a meeting with your personal tutor? Need a laboratory, some specialist equipment and a technician to run an experiment? Resource Booker lets you book multiple resources for a single booking.

### Advanced Rules and Permissions

Control who can book what, and when they can book it. Enforce an approval process. Define booking rules and quotas. Permissions can be managed in Resource Booker alone, or linked to Active Directory groups. Administrators are in full control.

### Notifications

Configurable request, acceptance, rejection, cancellation and change email notifications keep users up to date with the status of their booking.

### Book on the Move

Responsive design ensures Resource Booker looks great on any device. Whether you're viewing on a mobile, tablet, laptop or monitor, the layout intelligently adjusts to make the best use of the space available. Make a booking wherever you are.
